Education

University of St Andrews   *September 2022 – June 2026*
Bachelor of Science (Honours) Computer Science
    - Relevant Modules: Object Oriented Programming, Programming Projects, Computer Systems, Programming with Data.

Work Experience

Freelance
Dec 2022 – Current
Frontend Software Engineer

https://madinamasjidwakefield.netlify.app/

- Enhanced the digital presence of a religious institution by developing a scalable, responsive, and cross-platform website. Utilised HTML5, CSS3 with BEM methodology, and JavaScript ES6+ to ensure an easy to use web application.
- Fostered close collaboration with clients to grasp and fulfil business requirements, exemplified by the successful implementation of a donation feature on the website.
- Proficiently conveyed technical solutions tailored to meet client needs, prioritising user-friendliness for end users.
- Orchestrated seamless integration with backend APIs to procure daily updated prayer times, employing CRUD HTTP requests for data retrieval and display purposes.

Employed
Sep 2021 – Jan 2022
Customer Service Personal Tax Consultant for His
Majesty's Revenue and Customs

- Professionally managed inbound calls, proficiently addressing intricate tax-related technical inquiries from customers.
- Demonstrated adeptness in utilising Cisco Jabber and Finesse applications to enhance customer interactions.
- Effectively communicated complex technical tax matters to customers lacking tax expertise, ensuring clarity and comprehension.

Technical Skills

Programming Languages: Java, JavaScript ES6+, Python, C

Tools and Frameworks: Git, HTML, CSS, npm, SQL
